

# PintlePro Protect

## Safe transport for your most vulnerable products

During the processing of vulnerable products such as eggs, potatoes, or many kinds of fruits, even the slightest impact can lead to instant product damage. A damaged product not only leads to product loss, it also brings more labour in the sorting and waste removal processes, making it non-sustainable and inefficient.

Belts from the PintlePro Protect series are equipped with soft pintles and are designed to treat the conveyed product with a soft landing, excellent positioning and safe transport. This makes the belts especially suitable to convey potatoes, carrots, tomatoes, bell peppers or even eggs.

The wide array of different pintle shapes, colours and hardnesses ensure a perfect fit for every application.

PintlePro belts are available in different thicknesses, colours, hardnesses and food-grade EU/ FDA certification is also possible.

Our in-house manufacturing allows for versatile fabrication possibilities: guideropes, endlessing, corrugated sidewalls and many more options!

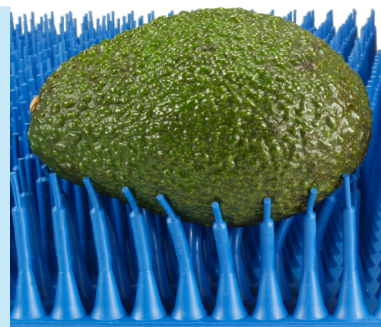

## Product Range

### PintlePro SuperSoft

The smooth pintles provide an extra soft landing, safe transport and stable positioning for the most vulnerable fruits and vegetables. Suitable for use in optical sorting machines, flexpickers and more.

Pattern	Pitch (L/W)	Height	Colour	Hardness	Foodgrade
Aligned	14,7/11,9 mm	47 mm	Blue/Black	55°A	Yes (Blue)

### PintlePro Soft

Suitable for the transport and fall absorption of harder products, such as carrots and potatoes. The products retain their position during transport, making this pintle belt suitable for optical sorting machines, flexpickers and more.

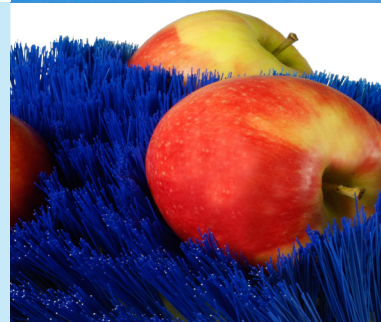

Pattern	Pitch (L/W)	Height	Colour	Hardness	Foodgrade
Aligned	11,9/11,9 mm	48,5 mm	Blue/Black	55°A	Yes (Blue)

### PintlePro Brush

Special brush belts for the transport of apples, pears and mushrooms. The products are caught by a bed of super soft brushes. This prevents damage to these vulnerable crops.

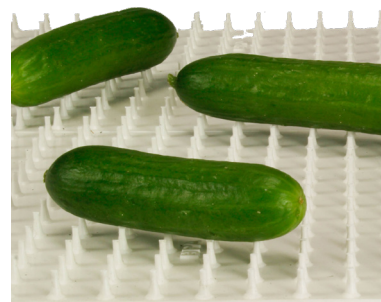

Pattern	Pitch (L/W)	Height	Colour	Hardness	Foodgrade
Aligned	Custom	Custom	Custom	Custom	Yes

### PintlePro Mini

A profiled belt with flexible mini pintles, designed for braking and accelerating fruit and vegetables. Suitable for the transport of unpacked foodstuffs and for use in sorting- and packing machines.

Pattern	Pitch (L/W)	Height	Colour	Hardness	Foodgrade
Staggered	12/12 mm	8 mm	Blue/White	Custom	Optional

### PintlePro EasyPin

Similar pintles to the Supersoft. Thanks to the modular design the pintles are easy to replace, can be positioned in any pitch and could be made into modular or positive drivebelts.

Pattern	Pitch (L/W)	Height	Colour	Hardness	Foodgrade
Custom	Custom	47 mm	Blue/Black	50°A	Yes
