

YONGLI ALUTROM

The manufacturing and assembly of a head- or tailpulley often takes a lot of time and labour. Do you develop conveyors for lightweight applications? And do you prefer a more efficient solution? Then choose the AluTrom developed by YONGLI Belting.

YONGLI AluTrom is a lightweight and stainless drum made of high quality aluminium. Because of the special construction, the shell has a very high degree of rigidity which reduces the chance of deformation.

Quick and easy assembly

Installation of YONGLI AluTrom is quick and easy: you just need to attach the cylinder on the shaft and secure it. Welding is not necessary. This provides you significant time- and labour savings.

Our product range

YONGLI AluTrom is available in almost any length and diameter. Optional it can be equipped with cover plates made of stainless steel and/or YONGLI covering material.

Diameter of drum (mm)	Diameter of shaft (mm)	SS cover plates (mm)	Keyway (mm)
60	25	59	8
75	25	74	8
80	25	79	8
90	25	89	8
100	25	99	8
120	30	119	10

ADVANTAGES

- + Fast and easy installation without welding
- + Less chance of distortion by special construction
- + Available in various lengths and diameters
- + Also available with non-slip covering material
- + Fast delivery from stock
- + High quality
